

LESSON 5 – ASSIGNMENT

1. Write a report on your set task, evaluating the photographic job which the professional photographer carried out at your friends wedding. Was there room for improvement, and if there was, what would you suggest could have been done. What problems if any did you identify had arisen and how could those be overcome in the future. (Write half a page).
2. Submit the two wedding photos which you cut out of a magazine in your set task. Describe how you think each one may have been taken, and comment on the quality and effectiveness of the photo in capturing the image it did. Suggest how these imaged may have been taken differently; what could have been changed, and what the results of those changes would be.
3. If you were asked to photograph a wedding for a friends daughter, on a budget of \$1000 (Australian dollars or if you live outside Australia. U.S dollars or your equivalent) plan the job. List the equipment and film you would take to the wedding. Estimate the time you would spend on the job (in meetings with the bride and groom, taking the photos, and following through with the processing). List the shots you plan to take, make one list of essential shots, and a second list of supplementary shots which may be taken if the opportunity presents itself. (1 – 2 pages maximum)
